ERC Starting Grant 2027

Part B1[1]

(Part B1 is evaluated in Step 1 and Step 2, Part B2 is evaluated in Step 2 only)

Proposal Full Title

PROPOSAL ACRONYM

Cover Page:

- Name of the Principal Investigator (PI): *Applicant Name*
- Name of the PI's Host Institution for the project: *Institution Name*
- Proposal duration in months: *XX months*

Text highlighted in grey should be deleted.

Proposal summary (identical to the abstract from the online proposal submission forms, section 1).

The abstract (summary) should, at a glance, provide the reader with a clear understanding of the objectives of the research proposal and how they will be achieved. The abstract will be used as the short description of your research proposal in the evaluation process and in communications to contact in particular potential independent external experts and/or to inform the Commission and/or the programme management committees and/or relevant national funding agencies. It must therefore be short and precise and should not contain confidential information.

Please use plain typed text, avoiding formulae and other special characters. The abstract must be written in English. There is a limit of 2000 characters (spaces and line breaks included).

If a secondary panel is indicated in the online proposal submission forms, please explain and justify the cross-panel or cross-domain nature of your proposal here. There is a limit of 1000 characters (spaces and line breaks included).

[1] Instructions for completing Part B1 can be found in the "*Information for Applicants to the Starting and Consolidator Grant 2027 Calls*".

Part I of the Scientific Proposal (max. 5 pages, references do not count towards the page limit)

Part I of the Scientific Proposal should present the envisaged research and it should:

- lay out the current state of knowledge,
- explain the scientific question and the objectives of the project, and
- present the overall approach or research strategy to reach the goals of the project.

Part I should convince the evaluation Panel that the proposal presents an original and creative idea addressing an important question in the research field(s). It should explain how the project will advance the frontier of knowledge, and what contribution it will make to the research field(s) i.e. what may be changed, opened, challenged or how the results of the work will alter the current understanding of the field.

When preparing Part I of the Scientific Proposal, applicants should keep in mind the evaluation elements assessed by the panel at Step 1 — see Section 1.6.5 of the "ERC Work Programme 2027".

At Step 1 of the evaluation, only Part I and the Curriculum Vitae (CV) and Track Record (see below) are assessed by the evaluation panel. Part I forms the basis for the panel's decision whether to evaluate the proposal in the next step. Therefore, all essential information must be covered in this part.

References to literature should also be included. Please use a reference style that is commonly used in your discipline such as American Chemical Society (ACS) style, American Medical Association (AMA) style, Modern Language Association (MLA) style, etc. and that allows the evaluators to easily retrieve each reference.

Please respect the following formatting constraints: Times New Roman, Arial or similar, at least font size 11, margin sizes (2.0 cm side and 1.5 cm top and bottom), single line spacing. See the official manual [1] for more information.

Curriculum Vitae and Track Record (max. 4 pages)

You may modify the below template if necessary.

PERSONAL DETAILS

Provide your personal details, your education and key qualifications, current position(s) and relevant previous positions you have held.

Family name, First name:
Researcher unique identifier(s) (such as ORCiD, Researcher ID, etc. …):
URL for website:

Education and key qualifications

DD/MM/YYYY **Ph.D.**
Name of Faculty / Department, Name of University / Institution, Country,
Name of PhD Supervisor.

DD/MM/YYYY **Master**
Name of Faculty / Department, Name of University / Institution, Country.

Current position(s)

YYYY – YYYY **Current Position**
Name of Faculty / Department, Name of University / Institution, Country.

YYYY – YYYY **Current Position**
Name of Faculty / Department, Name of University / Institution, Country.

Previous position(s)

YYYY – YYYY **Position held**
Name of Faculty / Department, Name of University / Institution, Country.

YYYY – YYYY **Position held**
Name of Faculty / Department, Name of University / Institution, Country.

RESEARCH ACHIEVEMENTS AND PEER RECOGNITION

Research achievements

Provide a list of up to ten research outputs that demonstrate how you have advanced knowledge in your field with an emphasis on more recent achievements, such as publications, articles deposited in a publicly available preprint server, books, book chapters, conference proceedings, data sets, software, patents, licenses, standards, start-up businesses or any other research outputs you deem relevant in relation to your research field and your project.

You may include a short, factual explanation of the significance of the selected outputs, your role in producing each of them, and how they demonstrate your capacity to successfully carry out your proposed project.

Peer recognition

Provide a list of selected examples of significant recognition by your peers if applicable, such as prizes, awards, fellowships, elected academy memberships, invited presentations to major conferences or any other examples of significant recognition you deem relevant in relation to your research field and project.

You may include a short explanation of the significance of the listed examples.

ADDITIONAL INFORMATION

You may provide relevant additional information on your research career to provide context to the evaluation panels when assessing your research achievements and peer recognition as described above.

Career breaks, diverse career paths and major life events

You may include a short factual explanation of career breaks or diverse career paths such as secondments, volunteering, part-time work, time spent in different sectors or the effects of major life events such as long term illness, including events that have no impact on eligibility, such as the effects of pandemic restrictions on research productivity.

Other contributions to the research community

You may include a list of particularly noteworthy contributions to the research community you have made other than research achievements and peer recognition, and a short explanation of these contributions. The purpose of this section is to allow the evaluation Panel to take a more rounded view of your career and achievements and to ensure that any additional responsibilities, commitments and leadership roles that you have taken on beyond your individual research activities are recognised and taken into account.

(for more information see "Information for Applicants to the Starting and Consolidator Grant 2027 Calls")

Do NOT split Part I from the CV and Track Record and/or references and do NOT upload them as separate documents. The peer reviewers will only receive one single document for evaluation at Step 1. Hence, Part B1 should contain all elements as explained in this template. If some parts of Part B1 are uploaded in the submission system as separate attachments, the peer reviewers will not have access to them.
